

Revolutionizing Driving Experiences With An Integrated Platform Application

Significant **Cost Savings**

Integrated **Stolen Vehicle Tracking** and **Theft Alarm** System

Convenience and **Security**

The client is a renowned multinational automotive manufacturer and a global leader in the automotive industry. With a rich history spanning over eight decades, the company has established itself as a trusted brand, delivering innovative and reliable vehicles to customers around the world.

Business Challenge

The client wanted to improve safety and security for drivers, streamline user experiences and enhance customer engagement.

Solution

To address this challenge, Innova developed a comprehensive platform to enhance operational efficiency that offered various car services with seamless communication, safety, and security:

- An integrated AI-powered voice assistant platform that changed how users interacted with their vehicles globally
- Our single platform application became the hub for accessing various car services, promoting seamless communication, safety, and security
- Skilled developers and designers collaborated to create an intuitive interface, allowing users to access multiple services effortlessly
- Users received accurate and up-to-date vehicle information, benefiting from personalized service recommendations and safety alerts
- Multilingual support provided accessibility for diverse users, making driving experiences user-friendly for all car users

Outcome

Innova's integrated platform application ensured seamless integration allowing users to manage their cars on the go effortlessly, enhancing customer engagement, and improving operational efficiency.

- Features like Stolen Vehicle Tracking and Theft alarms integrated into the app, users can monitor their vehicles securely, receiving timely alerts for suspicious activity. This comprehensive solution enhanced car owners' convenience and peace of mind
- Users can now control their vehicles via Apple and Android smartwatches, enhancing convenience and interaction with the platform
- With streamlined internal processes and consolidation of service offerings, the client achieved significant cost savings while experiencing smoother workflows
