Accelerate Revenue, Reduce Legal Costs & Contractual Risks using Innova Smarter Contracts with IBM Cloud Pak® for Business Automation

Innova Smarter Contracts is a SaaS-based and AI-powered (NLP & OCR) end-to-end enterprise Contract Lifecycle Management (CLM) platform. It democratizes contract authoring and establishes effective post-signature contract management practices using the power of AI.

What We Offer

Innova Smarter Contracts supports organizations throughout the contract lifecycle – from request to renewal – and enables effective collaboration for internal and external stakeholders such as vendors and customers. The CLM platform is built with customizable and intelligent workflows to seamlessly integrate with enterprise applications and offer actionable insights to users across various functions. It helps companies shorten contract cycle time, reduce risks, enforce compliance, fulfill obligations, and adapt to an ever-evolving regulatory environment. It is also fully integrated with MS office 365, MS Dynamics and Salesforce®.

Value Proposition

Accelerate revenue realization with **40%** reduction in contract authoring time

Reduction in revenue leakage (9% of bottom line) and **10%-12%** reduction in overall expenses.

Improved compliance and risk reduction – **2%** of annual costs.

Why Innova Smarter Contracts?

End-to-End CLM Platform

Innova Smarter Contracts addresses all the stages of the contract lifecycle – with powerful pre-signature and post-signature modules and an exhaustive range of features. It is easily customizable to meet the requirements of your business.

Enterprise Grade Offering

Innova Smarter Contracts goes beyond digital signatures and repositories – it is built for the enterprise. It integrates with your enterprise applications, including ERP, CRM, eSign, P2P, S2P, and MS Word.

- It facilitates collaboration across functions such as legal, sales, procurement, and finance
- It covers all the contract types and serves as a repository of all your legacy contracts
- It offers insights on contract templates, clauses, and exceptions for better control and compliance
- Powered by IBM Cloud Pak® for Business Automation

SaaS Platform + Quick Implementation

The platform is built on a robust architecture and offers multiple configuration options. It goes beyond customizing just business rules, approvals, and escalations. The platform can go deeper to configure workflows at the entity, template, and clause-levels.
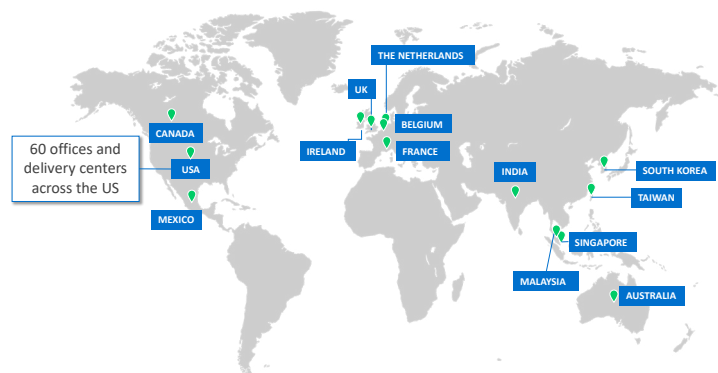

An Intuitive & User-friendly Design

It has been developed by technologists, lawyers, and contract management experts - offering the best in terms of technology, domain expertise, and process transformation. It is intuitive for business users across the spectrum and flexible to adapt to your specific needs.

AI-powered with NLP + OCR Capabilities

The AI engine quickly and accurately reviews the contract and extracts key metadata including tables, obligations, and clauses. Other AI capabilities include Natural Language Search across the repository with intelligent filters, tracking multiple versions of contracts and identifying the deviations between those versions, risk assessment, and score for clauses.
