Create Accurate, Usable, and Complete Documentations with Design Librarian

Enterprises across industries are seeking ways to operate more efficiently and accelerate digital transformation. Despite this, they continue to gather larger quantities and more diversified data than ever before and store them in siloed apps. During this process, enterprises are likely to confront case management challenges that require insight, responsiveness, and collaboration.

IBM Case Manager Software brings together information, processes, and people to offer a 360-degree perspective of case information and deliver optimized outcomes. However, enterprises are likely to face the below challenges if they utilize IBM Case Manager Software as a document or content repository:

- Complexity
- Lack of Overview
- Data Gathering Inefficiency
- Inaccuracy
- Lack of Usability
- Change Management Difficulties
- Language Barriers

What We Offer

We, at Innova Solutions, a global IT services provider, focus on empowering our clients with Case Management Solutions that offer a comprehensive overview of information, data, and status essential for better and faster decision-making abilities.

Design Librarian from Innova Solutions streamlines and automates the gathering, analysis, and documentation of IBM systems configuration information, enhancing its efficiency, accuracy, and capability to detect anomalies.

Before Design Librarian Vs with Design Librarian?

Comparing the difference in scenarios before and with the installation of Design Librarian:

Before Design Librarian

Documentation is accomplished as a one-time event. It is frequently out of date, missing, or the incorrect version. It is also difficult to understand how the solution is designed, configured, managed, or used. Documentation is predominantly stored in a project management repository separate from the core content repositories with manual correlation.
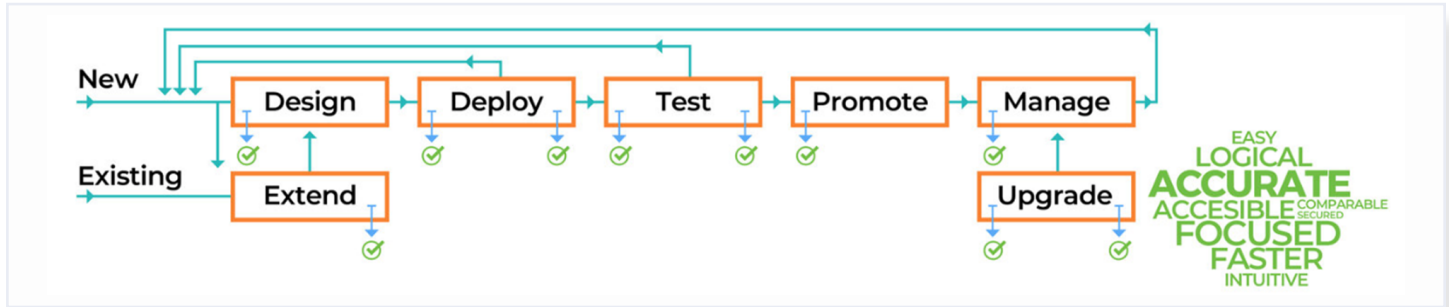

Unique Features

The unique features of Design Librarian that distinguishes itself as a solution include:

- Agile Design for Rapid Build
- Easy to use and deploy
- Presence of a single source of information
- Managed, controlled, and secure.
- Span across Multiple environments and solutions
- Support Various formats and language options

With Design Librarian

Documentation can be created whenever it is required, and it is always up-to-date, accurate, complete, comparable, and correlated with their respective content repositories. The relevant information is presented in an easy-to-understand manner, allowing you to quickly comprehend how it is designed, configured, deployed, and controlled.

Why Innova Solutions ?

7+ Years of IBM Partnership
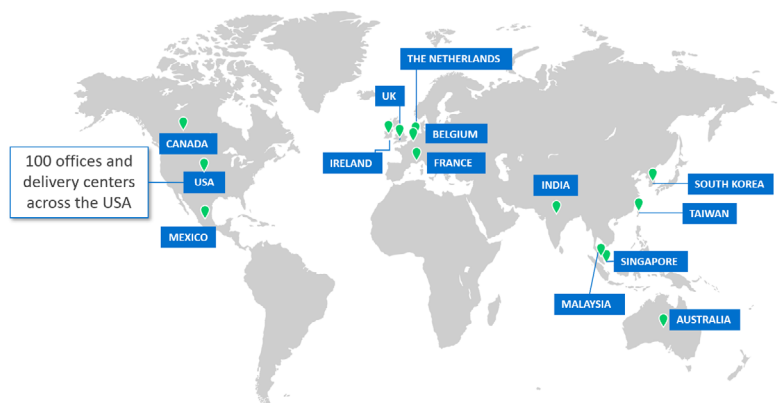

200+ IBM Professionals

100+ Client Successes

By considering Innova Solutions as a partner, you are choosing an enterprise who has shared a strategic partnership with IBM since 2015. The Innova Solutions team has resources with the necessary skills and required experience to help you make the most of your IBM technology investments. Our IBM Digital Transformation Services teams have been enabling clients globally in modernizing their IBM legacy systems and applications.

Innova's distinguishing features in terms of IBM capabilities include:

- Presence of an IBM Center of Excellence and an experienced team of engineers and SMEs
- Several enterprise success projects over the past 10+ years
- Best-in-class cloud modernized technology & business solutions
- Expertise across various IBM Cloud Pak suite of products
- Global delivery and support
- Flexible engagement models adapted to your specific business requirements
