Life Sciences Analytics Solution

In the dynamic landscape of Life Sciences, the demand for analytics emerges from a combination of complex challenges. Data silos fracture insights, while disconnected data sources, ranging from genomics to clinical trials, lack the depth of context necessary for holistic understanding. This context deficit hinders the complete comprehension of intricate biological systems, accurate protocol design, effective Patient engagement, site identification, etc.

This causes unacceptable levels of trial failures, extended trial execution time, escalated drug prices and ultimately slowing down progress in finding urgently needed life-saving treatments for Patients.

Innova's Life Sciences Analytics Solution

Innova's Life Sciences Analytics solutions is a purpose-built platform that fast-tracks and eases the analytics solution implementation through a structured approach leveraging AI/ML.

EXTRACT	ENRICH	AUGMENT
From multi-modal datasets like EMR/EHR, claims, codes etc. with pre-trained library of ML models	Normalize data by linking multi-source data to UMLS standards and pairing with human context, to build enriched views	Augment decision making and accelerate data discovery, and with complete, accurate insights from all data

Features

Innova's Life Sciences Analytics solution strives to accelerate drug discovery with pinpoint accuracy, optimizing trials to slash costs and timelines, and delivering patient-centric treatments that redefine care. Our AI-driven platform isn't just analytics; it's a catalyst for transformative outcomes.

Standardized
Helps consolidate information from disparate sources, such as, SDoH, clinical, claims, omics, labs, pharmacies etc. available in structured, semi, and unstructured formats.

Compliant
Ensures that data-driven insights are obtained within a secure and compliant environment, safeguarding patient privacy and maintaining the integrity of research outcomes.

Accessible
Enables users to harness the power of data effectively to drive innovation, improve patient outcomes, and advance scientific understanding in the field of life sciences.

Highly Contextual
Provides an AI-powered insights layer over the data hub that allows for easy access to information that is contextual and boost decision making

Our solution has helped deliver

10x
Improvement in productivity of clinicians and researchers by 10x

01

50%
Reduction in administrative costs and timelines

02

Patient centric outcomes and positive experiences

03

Our Key Partners

Microsoft Solutions Partner | aws | Google Cloud Partner | salesforce PARTNER | IBM. Silver Partner | UiPath Partner | snowflake

Our Global Footprint and Delivery Capabilities

ISO 9001 | ISO 27001 | ISO/IEC 27001 Information Security Management | ISO 13485 | HITRUST CSF Certified

SOC II TYPE II | HIPAA HITECH Compliant | PCI DSS COMPLIANCE | CCPA | GDPR

About Innova Solutions

Founded in 1998 and headquartered in Atlanta, Georgia, Innova Solutions employs approximately 50,000 professionals worldwide and reports an annual revenue approaching $3 Billion. Through our global delivery centers across North America, Asia, and Europe, we deliver strategic technology and business transformation solutions to our clients, enabling them to operate as leaders within their fields.
